Longview First: Focus Areas

The Longview First committees were originally created in 2006 to address various issues affecting the Longview community. Similar to a task force, each of the committees had a very specific purpose and short timeline. Examples of the committees included the Sports Tourism Committee, the Construction Advisory and Enhancement Task Force, Vision 2010, and Vision 2015. These committees are not currently active, but the results have had an impact.

Of special note, Vision 2010 and Vision 2015 were strategic planning efforts that provided suggested goals to the Longview City Council. More information about the Vision 2010 and Vision 2015 strategic plans can be seen through the links below.
